

“Modify your Hydraulic Cylinder Stroke”

AGR produces the ORIGINAL RockRam Cylinder Assist Steering, and the RockRam Full Hydro Steering! Matching your cylinder stroke to the rest of your steering components is key for performance and wear.

Our Services to disassemble your cylinder, machine the Delron spacer and reassemble your cylinder is as follows

Hydro Assist Cylinder, **\$100.00**

Full Hydro Cylinder, **\$125.00**

If additional parts are needed, we will provide you an estimate before the work is done.

Watch our YouTube Video Titled, “How to calculate cylinder stroke to match your steering travel”

Benefits to using AGR Performance Steering are

- Our spacers do not scrape or gouge your cylinder or rod
- Our spacers are fitted so air is not trapped in the cylinder causing bleeding frustrations
