

“Rebuild your Power Steering Gearbox”

Our Standard Gearbox Rebuild is **\$295.00**, This includes the following

- Complete disassembly, cleaning all components and media blasting the housing
- Magnaflux inspection for stress and crack detection
- Lathe polishing and runout measurement
- Re-Machining of the valve bore, piston bore, and sector shaft bore
- High-polish the worm gear to remove material to allow larger than factory stainless steel roller bearings
- Rebuild and rebalance the directional valve
- Replace all bearings, seals, teflons and wearable parts
- Steel-It, Stainless Steel Coating
- Dyno testing, and Load testing EVERY SINGLE ASSEMBLY

Additional Services can include

- Ratio Changes, (number of turns lock to lock)
- Custom Valving, (steering effort and “road feel”)
- Machining the sector shaft journal, (double bearings & seals)
- Billet Aluminum (top and end caps)
